

## 2016 Winter Update

The [Center for Environmental Excellence by AASHTO](#) has launched several key enhancements to its website to better serve the needs of transportation practitioners.

- ***Environmental Topics for the 2016 Practitioner*** – explore curated content for 21 environmental topics, reorganized to better highlight the importance of the environment in transportation, featuring updated content, new case studies, and new topics:
  - Energy/Greenhouse Gas Emissions **NEW**
  - Health and Human Environment **NEW**
  - Infrastructure Resilience **NEW**
  - Planning & Environment Linkages **REVISED**
  - Section 4f/Section 6(f) **REVISED**
- ***Filter/Sort Content by Six Disciplines*** – find recent developments, research and case studies by one of six disciplines ([planning](#), [design](#), [construction](#), [maintenance](#), [operations](#), [project delivery](#)).
- ***Filter/Sort Recent Developments by Transportation Mode and by State*** – find recent developments by one of four modes (highway, transit, rail, bike/ped) or by states.
- ***Custom Center Email Updates*** – optionally [subscribe](#) to quarterly email updates about new Center products and programs, and/or weekly email updates listing new website content postings, customized for your specific interests. Current users may also [update your topic preference](#) and [update your e-mail address](#).

**Users also may access the *Find It Fast Search Tool*.** Turn “on” this interactive tool for a snapshot of home page navigation options, with short descriptions of key website features and tools.
