State departments of transportation (DOTs) continue to face new and more complex state and federal regulations to reduce pollution in their stormwater discharges. This webinar provides information presented and discussed at the American Association of State Highway and Transportation Officials (AASHTO) National Stormwater Meeting recently held.

This webinar will cover:

AASHTO Update

AASHTO has actively engaged DOT stormwater practitioners on development of practical information and resources on best practices to implement key elements of the stormwater program specific to the highway environment. Available information and resources will be highlighted.

Overview of the National Practitioner's Meeting

A recent meeting was held between DOTs, FHWA, and AASHTO Stormwater representatives from across the nation. An overview of the highlights of topics discussed, DOT challenges with stormwater requirements, and peer to peer exchange of information will be provided.

US Environmental Protection Agency (USEPA) Update

Updates will be provided by USEPA on recent stormwater regulations and upcoming stormwater rulings as it pertains to DOTs across the nation. In addition, an overview of the responses from the Information Collection Request (ICR) received from DOTs across the nation will be provided.

DOT Stormwater Practitioner's Best Practices

A technical presentation will highlight topics discussed during the national meeting and contents of the post-meeting white paper on the following:

- NPDES permitting trends and new permit activities
- Audits conducted by the states or USEPA, and how to prepare for a DOT audit

- Stormwater Asset management programs
- Contemporary post-construction stormwater controls
- Effectively focused construction stormwater management
- The watershed approach

Our Speakers will include:

KATE KURGAN, Senior Program Manager for Environment, Center for Environmental Excellence by AASHTO.

SCOTT MCGOWEN, P.E., Chief Environmental Engineer, California Department of Transportation

RACHEL HERBERT, Physical Scientist, USEPA Headquarters, Water Permits Division

ANNA LANTIN, P.E., Vice President, RBF Consulting, a Company of Michael Baker Corporation

Who should attend?

- DOT Stormwater Program Managers and Practitioners
- DOT Transportation Engineers, Construction, and Maintenance with Stormwater responsibilities
- Stormwater professionals and managers
- Environmental compliance professionals

This webinar is presented by the Center for Environmental Excellence by AASHTO.

After the LIVE event, the webinar will be available for on-demand viewing
