

# ROADMAP AND TRACKING TOOL FOR DEVELOPING AND IMPLEMENTING PROGRAMMATIC AGREEMENTS

# WEBINAR

**MONDAY, MAY 23, 2016**

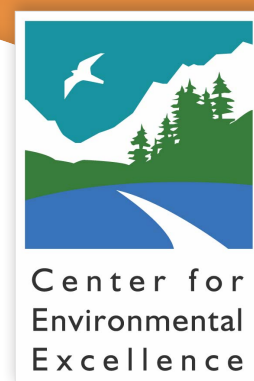

**1:00PM – 2:30PM**

## JOIN US

for an interactive webinar to explore the newly created Roadmap for Developing and Implementing Programmatic Agreements and the Programmatic Agreement Tracking Tool. Representatives from the Federal Highway Administration (FHWA), state Departments of Transportation (DOTs), and resource and regulatory agencies will share their experiences in developing and implementing Programmatic Agreements.

The Roadmap is a user-friendly web-based tool that will guide practitioners through the process required to develop and implement a Programmatic Agreement. The roadmap provides relevant examples of successes and challenges at key decision points, as well as highlights successful strategies for establishing Programmatic Agreements, including common phrasing/clauses, scope, and structure.

Building on the [FHWA and Volpe National Transportation Systems Center: Benefits and Costs of Programmatic Agreements report](#), the Tracking Tool provides a user-friendly and easily accessible web-based template for state DOTs to clearly and concisely track the short- and long-term benefits of developing and implementing Programmatic Agreements. The tool tracks both non-recurring (one-time or start-up) costs and recurring (ongoing) costs associated with implementing, maintaining, and updating a Programmatic Agreement. The tool also tracks both quantitative benefits (shortened project timelines, reduced mitigation costs, redirected staff time, etc.) and qualitative measures (increased level of predictability/certainty and better relationships between the FHWA, DOT, and/or the other state and federal agencies).

## FEATURED SPEAKERS:

- **Eric Beightel, WSP|Parsons Brinckerhoff**
- **Tienna Kim, WSP|Parsons Brinckerhoff**
- **Marlys Osterhues, FHWA**
- **Chris Regan, Washington State DOT**
- **Kevin Walsh, Massachusetts DOT**
- **Dave Paulson, Massachusetts Natural Heritage and Endangered Species Program**
