Extra Credit Questions!

We would also appreciate your thoughts on the following questions:

1. Do you have any additional project examples illustrating concepts presented in this document? If so, please provide short description and contact information.
2. Have you prepared an abbreviated Final EIS (as allowed by current reg.s) – if so, do you have tips for combining plain language, brevity and clarity within a condensed FEIS?
3. The task team presents this as a starting place. Do you feel we've covered new ground? What's missing?
