Who should attend?

- DOT Stormwater Program Managers and Practitioners
- DOT Transportation Engineers, Construction, and Maintenance staff with stormwater responsibilities

Construction to Maintenance Handoff

**THURSDAY, DECEMBER 5, 2019
12:00 PM - 1:30 PM (EST)**

As DOTs are responsible for stormwater compliance from construction temporary best management practices (BMPs) to post-construction BMP maintenance, the process of transition from construction to maintenance can assist compliance effectiveness. This webinar will discuss processes or protocols to identify, evaluate, and document the status of stormwater-related elements of the project that assist in this critical transition.

The AASHTO Center for Environmental Excellence provides the Stormwater Community of Practice (CoP) forum for State Department of Transportation (DOT) stormwater practitioners to discuss current and emerging issues in stormwater management and the development and implementation of NPDES programs. Outcomes of the CoP collaboration focus on information sharing, improving State DOT implementation of stormwater programs through webinar panel discussions, and question/answer sessions.
