Join us for a live Stormwater Community of Practice Web Forum

On behalf of the Federal Highway Administration and Center for Environmental Excellence by AASHTO

The organizational structure of the DOT stormwater management program affects the effectiveness of the entire program. DOT stormwater program managers have broad responsibilities spanning environmental and program planning, design, permitting, construction, and operation and maintenance. In this web forum, we will discuss the organizational attributes that are key to an ideal organization structure that promotes surface water quality protection. The presenters will give insights into the practice of these attributes, which include integration of stormwater program requirements into the day-to-day business practices of the DOT organization.

Stormwater Program Organizational Structure

Thursday, March 17, 2016
11:00 am – 12:30 pm Eastern Time

This webinar will cover:

• Stormwater regulatory drivers affecting the DOT organizational structure
• Examples of DOT Stormwater Program Organizational Structures
• Advantages and streamlining of organizational structure at the Headquarters Functional Divisions and at Regional/District Functional Divisions affected by stormwater requirements
• Program Effectiveness and Roles and Responsibilities

The AASHTO Center for Environmental Excellence provides the Stormwater Community of Practice (CoP) forum for Department of Transportation (DOT) stormwater practitioners to discuss current and emerging issues in stormwater management and the development and implementation of NPDES programs. Outcomes of the CoP collaboration focus on information sharing, improving DOT implementation of stormwater programs through webinar panel discussions, and question/answer sessions. The topic discussion on DOT construction projects will be led by speakers from DOTs across the country.

Who should attend?

• DOT Stormwater Program Managers and Practitioners
• DOT Transportation Engineers, Construction, Environmental Planners, and Maintenance
