Join us for a live Stormwater Community of Practice Web Forum

On behalf of the Federal Highway Administration and Center for Environmental Excellence by AASHTO

DOTs are obligated to comply with their state’s NPDES Construction Permit or the EPAs General Construction Permit. Many DOTs also have a construction element in their MS4 NPDES Permit. DOT construction projects are unique in that they have a limited construction and laydown area, often have multiple receiving water crossings, include structure construction and large earthmoving operations.

Join us for an informative web forum that discusses the very latest in DOT construction stormwater tools, administration and enforcement programs. We will discuss what is working in the field, how to administer an effective program, and how to incentivize compliance. Learn from the experts, and take advantage of the opportunity to ask our practitioner panel your questions.

Duration: 1.5 Hours  Starting promptly at 11:00 Eastern Time. Please log in early.

No registration or fees required

Stormwater and DOT Construction Projects

Thursday, January 28, 2016
11:00 am – 12:30 pm EST Eastern Time

This webinar will cover:
• Lessons learned and the latest technology for temporary construction BMP practices
• How to administer a construction program
• Incentivizing program compliance with contractors
• Facilitating reporting and tracking

The AASHTO Center for Environmental Excellence provides the Stormwater Community of Practice (CoP) forum for Department of Transportation (DOT) stormwater practitioners to discuss current and emerging issues in stormwater management and the development and implementation of NPDES programs. Outcomes of the CoP collaboration focus on information sharing, improving DOT implementation of stormwater programs through webinar panel discussions, and question/answer sessions. The topic discussion on DOT construction projects will be led by speakers from DOTs across the country.

Who should attend?
• DOT Stormwater Program Managers and Practitioners
• DOT Transportation Engineers, Construction, and Maintenance staff with stormwater responsibilities
