- NEPA Process
- Noise
- Project Delivery/Streamlining
- MAP-21
- Section 4(f)
- Sustainability
- Tribal Consultation
- Waste Mgmt/Recycling/Brownfields
- Water Quality/Wetlands
- Wildlife and Ecosystems

Montana DOT Develops Guidance for Indirect Effects Analyses eeded consistency and efficient procedures for determining the indirect land use and View from Montana Highway 200. (Photo: Montana DOT) The guidance will help ensure compliance with requirements for analyzing projects' potential velopment process regarding the characteristics and location of the project.

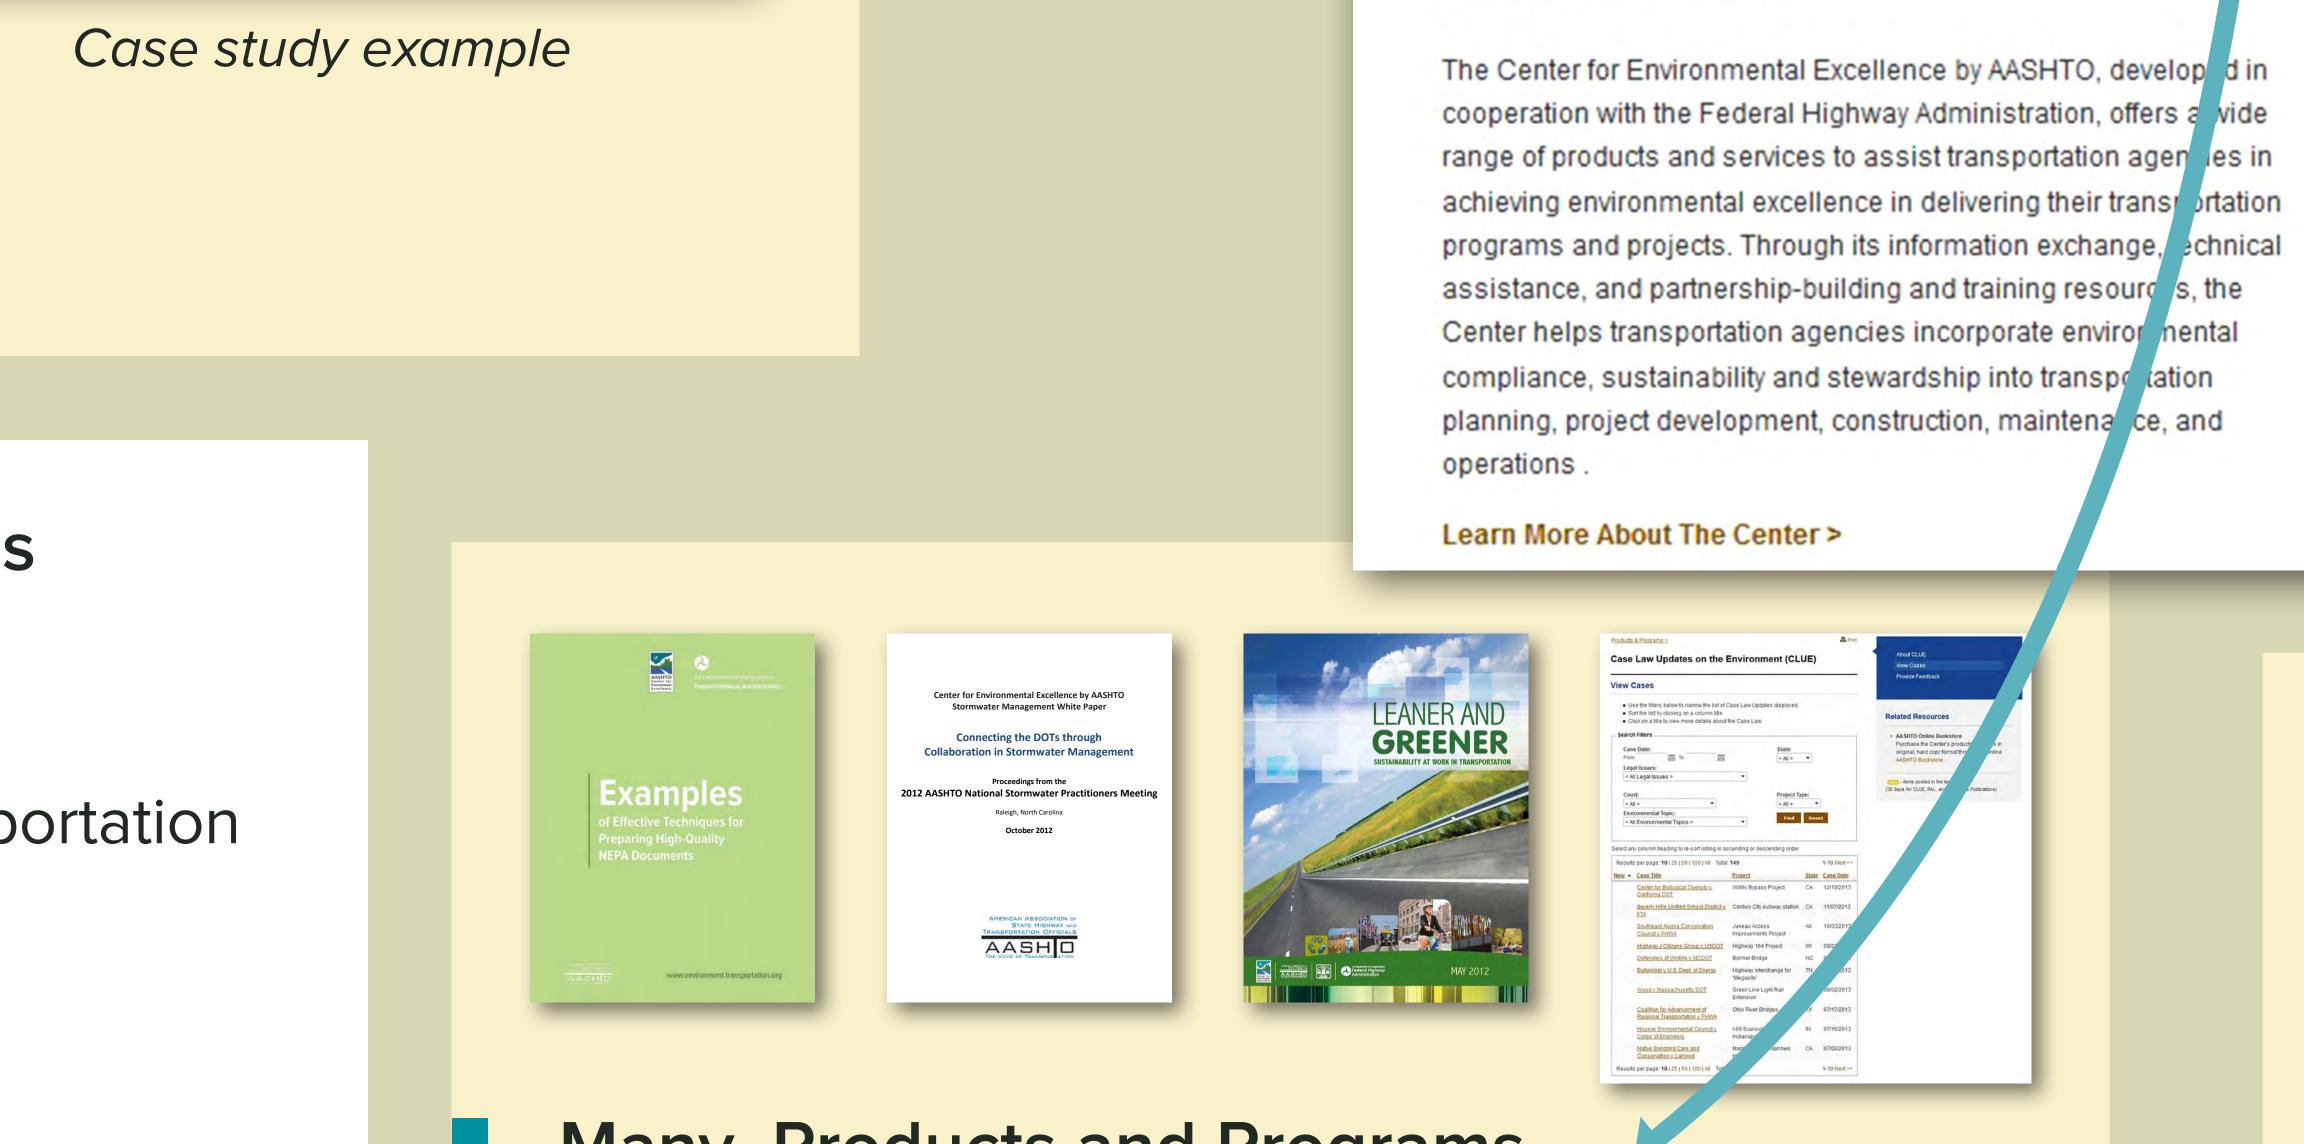

five-part screening process provides a list of questions for staff to consider. These include

The Center for Environmental Excellence was developed in cooperation with FHWA to

- Promote environmental stewardship
- Encourage innovative ways to streamline transportation delivery

The Center is a resource for transportation professionals seeking

- Technical assistance
- Training
- Information exchange
- Partnership-building opportunities
- Quick-and-easy access to environmental tools

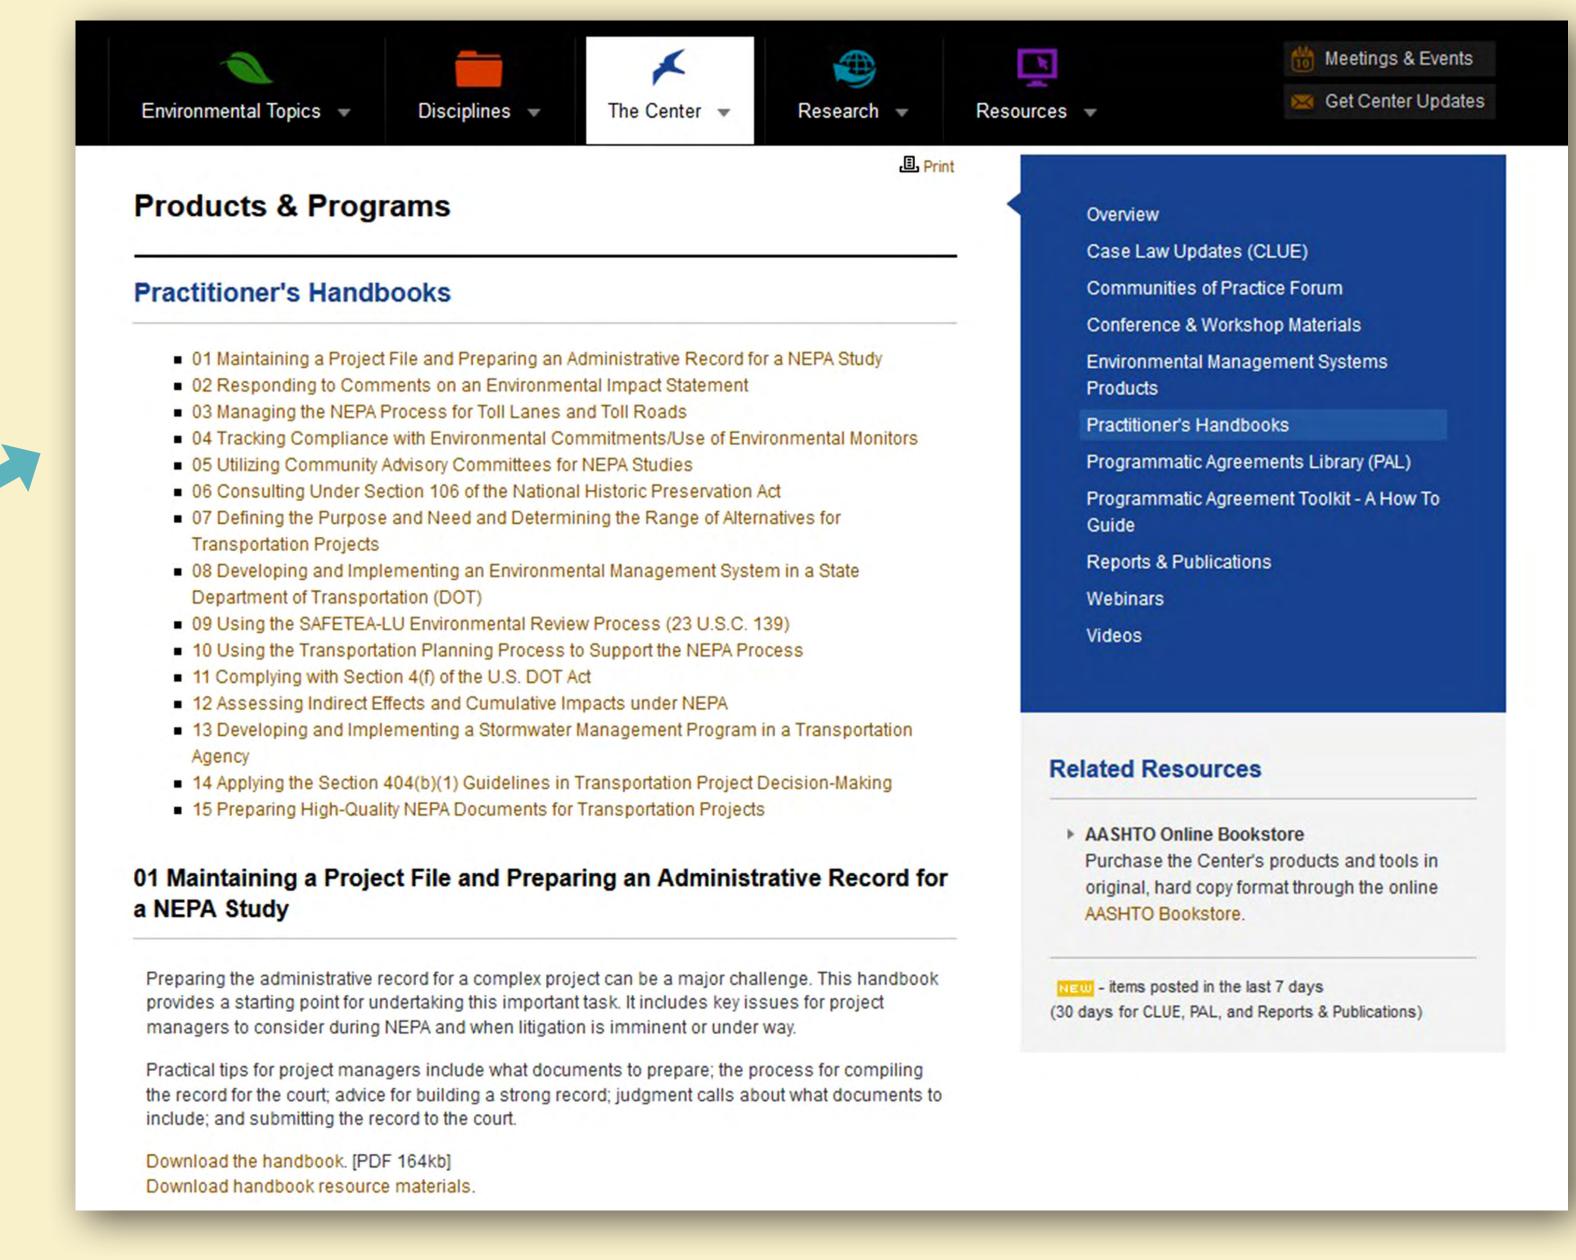

Many Products and Programs are developed through the Center, including:

- Best practice documents
- Reports
- Case law updates on the environment
- Peer exchanges and conferences
