

Construction to Maintenance Handoff December 5th, 2019

Center for Environmental Excellence

- Promotes environmental stewardship and encourages innovative ways to streamline the transportation project delivery process.
- Provides technical assistance, training, information exchange, partnership-building opportunities, and quick and easy access to environmental tools.
- Provides a variety of products and services to assist transportation agencies in achieving environmental excellence including:
 - Peer Exchanges
 - Practitioner's Handbooks
 - Communities of Practices
 - Webinars
 - Databases

Michael Backer International

Community of Practice Forum Overview

- I. 90% Walkthrough Construction to Maintenance Handoff
 - Pete Riegelhuth, California Department of Transportation
- II. The Flow of Stormwater on Vtrans Projects An Evolving Process
 - Jennifer Callahan, Vermont Department of Transportation
 - Heather Voisin, Vermont Department of Transportation
- III. Community of Practice Forum
 - Scott McGowen, Michael Baker International
- IV. Closing

90% Walkthrough Construction to Maintenance Handoff

Pete Riegelhuth
D-5 NPDES Coordinator
California Department of Transportation

90%Walkthrough Construction to Maintenance Handoff

Presentation by: Pete Riegelhuth

Construction Policy Bulletin 13-1

- Effective July 27, 2013
- Due to projects ending with... "elements such as structural treatment best management practices (BMPs), drainage systems, and permanent erosion and sediment controls that were not functional or maintainable."

CONSTRUCTION MANUAL

Maintenance Reviews Sec 5-006

 Requires a project field review with Maintenance at approximately 90% completion.

 To identify items necessary to comply with the NPDES Permit and the Construction General Permit

Final Inspection and Contract Acceptance Sec 3-523

Resident
 Engineer
 schedules a
 final inspection
 review with
 Maintenance
 and other
 Caltrans
 divisions.

 During the 90 percent field review meeting, the resident engineer and district maintenance stormwater coordinator will complete Form MTCE-0023, "Construction to Maintenance 90% BMP Completion Walkthrough."

CONSTRUCTION TO MAINTENANCE 90% BMP COMPLETION WALKTHROUGH

MTCE-0023 (REV 10/2018) Page 1 of 6

Project ID Number	EA Number	Inspection Attendees			
Date					
Project Information (S	Statement of Ongoing Co	ontracts http://www.dot.ca.gov/hq/construc/state	ement.html)		
Project Limits Co - Roi	ute - PM1 to PM2	Estimated Completion Date	Estimated Acceptance Date	EFIS Unit	District Cost Center

1. List the New, Removed, and Modified Treatment BMPs Within the Project Limits. If none, select "NONE" in the TBMP Type field and delete the remaining rows. (Note: Final approval includes receipt of an O&M manual if applicable)

#	TBMP Type	County	Poute	Direction of Travel	Begin PM			CCO	State Any Corrective Actions Needed on the Treatment BMP
"	T DIVIT Type	County	Route	Direction of Traver	End PM	Begin Longitude	End Longitude	Filed?	State Arry Corrective Actions Needed on the Treatment Divil

4	-	•					X
± ₅	•	•					X

Walkthrough Topics

- Post Construction Runoff Control TBMPs
- Drainage System
- Illegal Connection/Illicit Discharge IC/ID
- Temporary Construction Site BMPs
- Permanent Erosion Control (Slope Stability)
- Plant Establishment
- Offsite Contractor Facility Cleanup

Where is the Bioswale?

How about this bioswale?

Identify Deficiencies

Go over maintenance requirements with field staff.

Caltrans Stormwater Quality Handbook Maintenance Staff Guide

CTSW-RT-18-314.20.1 May 2018

California Department of Transportation Division of Environmental Analysis, Stormwater Program 1120 N Street Sacramento, California 95814 http://www.dot.ca.gov/hq/env/stormwater/

Maintenance Indicator	Inspection Frequency	Maintenance Activity
Evidence of significant channeling, erosion, seeps, or ponding	Annually in late wet season	Correct channelized, eroded, seeped, or ponded areas using additional fill and vegetation depending on coverage and/or by removing accumulated sediment. Complete prior to next wet season.
Average vegetation height exceeds 12 inches, emergence of trees, or woody vegetation	Semi-Annually, once during wet season, once during dry season (depending on growth)	Cut vegetation to a minimum height of 6 inches; cuttings may be removed a discretion of District Maintenance.
Less than 70 percent background coverage in swale invert and swale side slope	Semi-Annually, once late wet season and once late dry season	Assess quantity needed and reseed/revegetate barren spots by November. Contact environmental or landscape architect for appropriate seed mix. Scarify area to be restored, to a depth of 2- inches. Restore side slope coverage with hydroseed mixture. If growth is unsuccessful after 2 applications (2 seasons) of reseeding/revegetating, consult with District Landscape Architect for potential solutions. Maintain shrubs and trees that were installed in the original design
Debris/trash present	Inspect during routine trash collection. Minimum twice per year during inspections.	Remove litter, and debris per routine District schedule.
Sediment at or near vegetation height, channeling of flow within swale and energy dissipaters, inhibited flow due to change in slope	Annually in the dry season	 Remove sediment. If flow is channeled, determine cause and take corrective action. If sediment becomes deep enough to change the flow gradient, remove sediment during dry season, characterize and properly dispose of sediment, and revegetate. Refer to Activity Cut-Sheet Page B-72. Notify engineer or District Maintenance Storm Water Coordinator to determine if regrading is necessary.
		If regrading is necessary, regrade to design specification and revegetate swale / strip. Regrading should start in May. Revegetate strip / swale by

Common Issues

- Infiltration Areas-Vegetated or non-vegetated and Compaction
- Bio-swales/strips use vegetation and infiltration to remove pollutants from runoff. (70% Vegetative Cover Requirement)
- Maintaining the vegetation in the bio-strip/swale is the key to success.
- It is important to maintain the bio-strips/swales as originally designed. (width & side slopes)
- Walk staff through the parts of Detention/Infiltration Basins.
- Trash

Pesticide Use- No No No

Vegetation Control

- DO NOT use herbicide to kill the grasses.
- DO NOT use court referral labor to remove the grasses.

It's okay if the grass looks dead. Leave it as is.

Per Maintenance Staff Guide

San Luis Obispo- NB-101 Shoulder

San Luis Obispo- NB-101 LOVR to Prado Road

San Luis Obispo- NB-101 LOVR to Prado Road

Temporary Construction Site BMPs

Temporary Construction Site BMPs

Learn from mistakes- Mulch vs...

Native grass sod

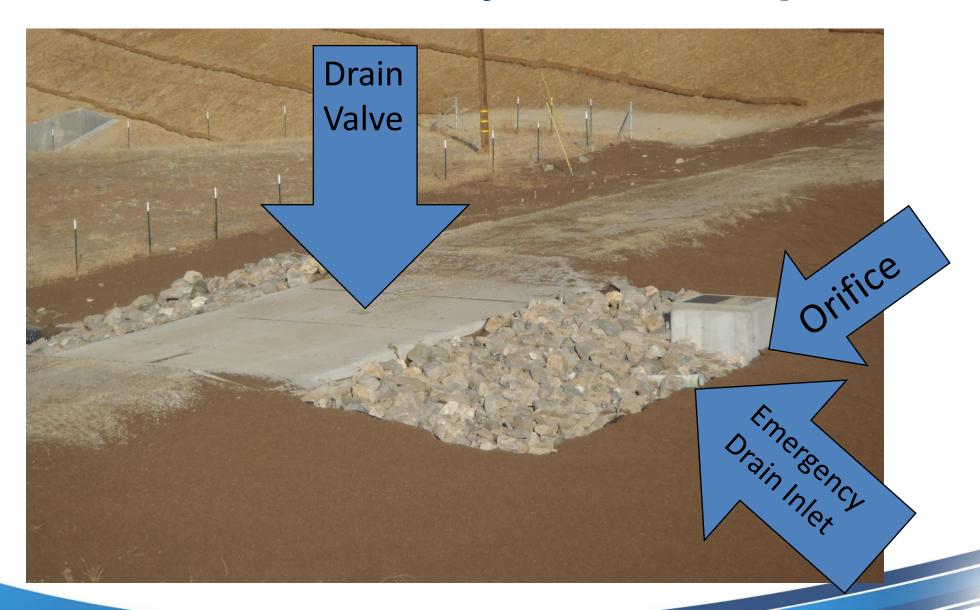

Detention Basin- Hwy 46

Talk about how they work- the parts

Maintain the Orifice

Maintain the Orifice

Maintain the Orifice

Look at Slope Stabilization

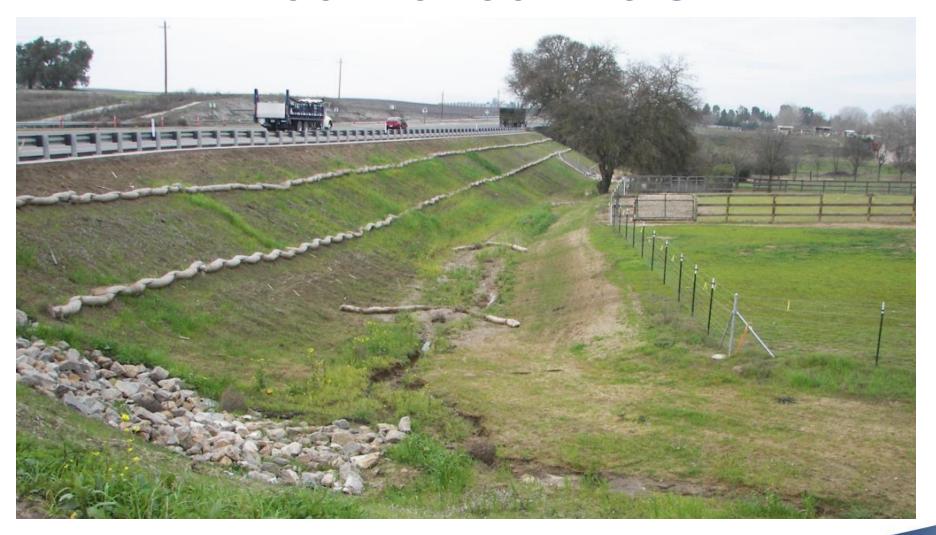

Look for scour problems

Look for conflicts

Access Points

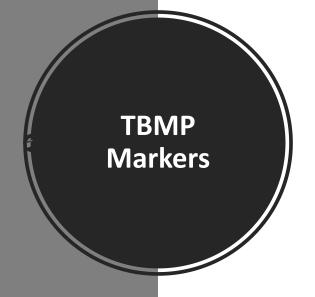

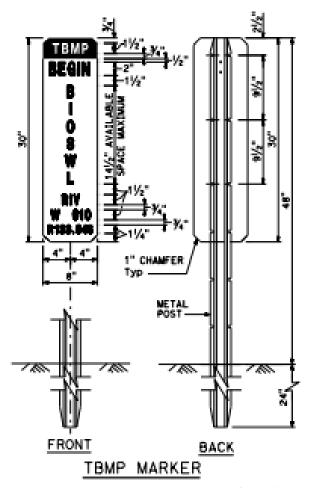

Do they drain properly

TREATMENT BEST MANAGEMENT PRACTICE (TBMP) MARKER

NOTES:

- The marker header shall be green (non-reflective) background with white (non-reflective) Series C letters.
- The marker body shall be white (non-reflective) target plate with black Series C numbers and letters.
- 3. "BEGIN" or "END" shall apply as directed by the Engineer.
- TBMP abbreviations shall be Series 0 letters up to a maximum of 2" tall, to fit within the available maximum space of 14.5".
- 5. See Project Plans for TBMP abbreviations.

Finalize TBMP Inventory

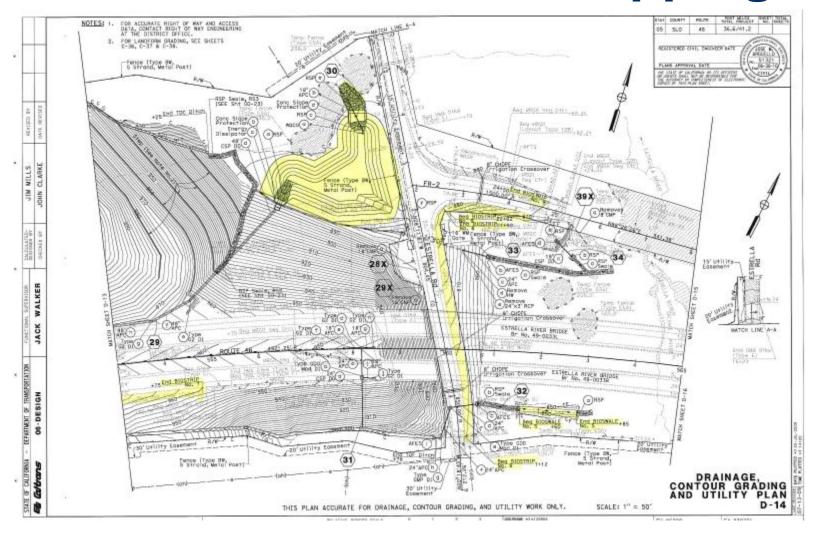

Provide list and calcs- As Builts

The Flow of Stormwater on Vtrans Projects An Evolving Process

Jennifer Callahan
Stormwater Technician
Vermont Department of
Transportation

Heather Voisin

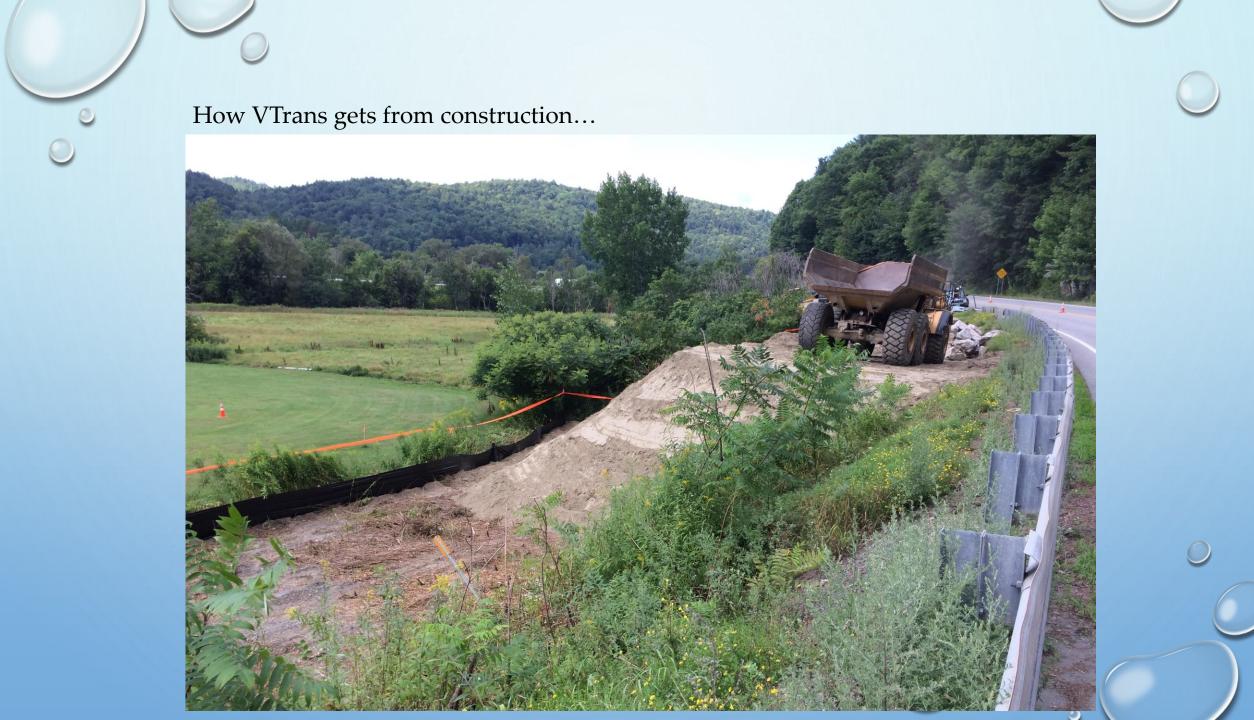

Green Infrastructure Engineer

Vermont Department of

Transportation

Regulations

- ACT 64 VERMONT'S CLEAN WATER ACT
- A BROAD SUITE OF PROGRAMS AND REGULATIONS
 TO ADDRESS WATER QUALITY INCLUDING:
- TRANSPORTATION SEPARATE STORM SEWER GENERAL PERMIT (TS4)
 - MUNICIPAL SEPARATE STORM SEWER SYSTEM (MS4)
 - MULTI-SECTOR INDUSTRIAL GENERAL PERMIT (MSGP)
 - STATE OPERATIONAL STORMWATER DISCHARGES (STATE OSW)
 - TOTAL MAXIMUM DAILY LOAD(TMDL)
- CONSTRUCTION STORMWATER DISCHARGES (NOT PART OF TS4)

Regulations

STATE OPERATIONAL PERMIT

- STATEWIDE PROGRAM REQUIRED ON PROJECTS THAT CREATE AN ACRE OR MORE OF IMPERVIOUS SURFACE.
 - THIS THRESHOLD WILL BE LOWERED TO 1/2 ACRE IN 2021.
- AVERAGE FOR VTRANS IS 10 PROJECTS PER YEAR OBTAIN UNDER THIS PROGRAM
 - EXPECTING THAT TO AT LEAST DOUBLE WITH THE THRESHOLD LOWERING
- CURRENTLY 86 PROJECTS CONSTRUCTED AND BEING MAINTAINED (AND GROWING).
- ANOTHER 54 PROJECTS UNDER DESIGN DEVELOPMENT, PERMITTING OR CONSTRUCTION.

TMDL IMPLEMENTATION

- REQUIRES THE CONSTRUCTION OF STORMWATER TREATMENT ON NEW AND EXISTING IMPERVIOUS SURFACES.
- IDENTIFY AND IMPLEMENT SW RETROFITS TO ADDRESS TMDLS/WQRPS
 - LAKE CHAMPLAIN PHOSPHORUS
 - STORMWATER IMPAIRED WATERSHEDS
 - OTHERS....
- ABOUT 60 PRACTICES PLANNED FOR SW-IMPAIRED WATERSHEDS, EXPECTING MANY MORE FOR LCTMDL
 - CURRENTLY HAVE 17 CONSTRUCTED, 20 DESIGNED AND PLANNED FOR CONSTRUCTION NEXT SEASON

Regulations

CONSTRUCTION GENERAL PERMIT

- STATEWIDE PROGRAM REQUIRED ON PROJECTS THAT HAVE AN ACRE
 OR MORE OF EARTH DISTURBANCE.
- TIERED PROGRAM BASED ON ASSESSMENT "RISK"
 - LOW RISK GENERAL PERMIT
 - MODERATE RISK GENERAL PERMIT
 - INDIVIDUAL PERMIT
- ON AVERAGE 30 VTRANS PROJECTS PER YEAR NEED THIS PERMIT

Staffing

VTRANS IS.....

- STRENGTHENING ITS STORMWATER PROGRAMS
- BUILDING PARTNERSHIPS TO IMPROVE WATER QUALITY
 THROUGHOUT THE STATE
- MAKING WATER QUALITY PROTECTION FUNDAMENTAL TO THE AGENCY'S WAY OF DOING BUSINESS

Notice of Authorization

Under Vermont Construction General Permit 3-9020 For Moderate Risk Projects

For introduction with a second contraction entrance at a location visible to the public. If displaying near the main entrance is infeasible, the exceeding near the active part of the construction project (e.g., where a pipeline project crosses a public post, the node shall be posted at a keep the building such as the town half or public library. For linear projects, the node shall be posted at a public post, the node shall be posted at a public post, the node shall be posted at a public post, the node shall be posted at a public post, the node shall be posted at a public post.

Date of Authorization: Date of Expiration: November 13, 2018

Date of Expiration:

November 12, 2023

The project listed above has received authorization under General Permit 3-9020 to discharge stormwater from the following construction activities: CHIMALIPHINES:

Initialization of new operational stormwater BMPs along the interstate median with associated access roads and drainage infrastructure and a retrofit of the existing wet nould at the morthbound rest area with associated access road and drainage infrastructure. installation of new operational stormwater BMPs along the interstate median with associated access roads and drainage into an a retrofit of the existing wet pond at the northbound rest area with associated access road and drainage infrastructure.

In summerization inclines the innovang requirements:

Implementation of the authorized site-specific Erosion Prevention and Sediment Control Plan as prepared by:
IVIB: Select of 54, "Conversional Symbology Legend Sheer," dated 10/2/2018; Sheet 2 of 54, "Ondex of Sheers," dated 10/2/2018; Sheet 3 of 54, "Conversional Symbology Legend Sheer," dated 10/2/2018; Sheet 4 of 54, "General Notes Sheet," dated 10/2/2018; Sheet 3 of 54, "Quantity Sheet 1," dated 10/2/2018; Sheet 6 of 54, "Typical Sections and Datalis Sheet 1," dated 10/2/2018; Sheet 6 of 54, "Uparal Sections and Datalis Sheet 1," dated 10/2/2018; Sheet 8 of 54, "Quantity Sheet (1 of 2)," dated 10/2/2018; Sheet 8 of 54, "Quantity Sheet (2 of 54," dated 10/2/2018; Sheet 8 of 54, "Quantity Sheet (2 of 54," Quantity Sheet (3 of 54," Quantity Sheet (3 of 54," Quantity Sheet (2 of 54," Quantity Sheet (3 of 54," Qu Sheet 5 of 54, "Typical Sections and Details Sheet 1", dated 10/2/2018; Sheet 6 of 54, "Typical Sections and Details Sheet 2", dated 10/2/2018; Sheet 3 of 54, "Quantity Sheet (1 of 2)", dated 10/2/2018; Sheet 8 of 54, "Cayout Plan Sheet (1 of 10)", dated 10/2/2018; Sheet 8 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 11 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of 54, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet (3 of 2)", dated 10/2/2018; Sheet 9 of Sd, "Layout Plan Sheet (1 of 10)", dated 10/2/2018; Sheet 10 of Sd, "Layout Plan Sheet (2 of 10)", dated 10/2/2018; Sheet 11 of Sd, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of Sd, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of Sd, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of Sd, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 12 of Sd, "Layout Plan Sheet (3 of 10)", dated 10/2/2018; Sheet 13 of Sd, "Layout Plan Sheet (7 of 10)", dated 10/2/2018; Sheet 17 of Sd, "Layout Plan Sheet (9 of 10)", dated 10/2/2018; Sheet 19 of Sd, "Layout Plan Sheet (9 of 10)", dated 10/2/2018; Sheet 19 of Sd, "EPSC Narrative (1 of 2)", dated 10/2/2018; Sheet 19 of Sd, "EPSC Narrative (1 of 2)", dated 10/2/2018; of S4, "Layout Plan Sheet (8 of 10)", dated 10:22:2018; Sheet 17 of S4, "Layout Plan Sheet (9 of 10)", dated 10:22:2018; Sheet 18 of S4, "Layout Plan Sheet (10 of 10)", dated 10:22:2018; Sheet 19 of S4, "EPSC Narrative (1 of 2)", dated 10:22:2018; Sheet 21 of S4, "EPSC Narrative (1 of 2)", dated 10:22:2018; Sheet 22 of S4, "EPSC Detail Sheet (2 of 3)", dated 10:22:2018; Sheet 22 of S4, "EPSC Detail Sheet (2 of 3)", dated 10:22:2018; Sheet 23 10/2/2018; Sheet 20 of \$4, "EPSC Narrative (2 of 2)", dated 10/2/2018; Sheet 21 of \$4, "EPSC Detail Sheet (1 of 3)", dated 10/2/2018; Sheet 22 of \$4, "EPSC Detail Sheet (2 of 3)", dated 10/2/2018; Sheet 23 of \$4, "EPSC Detail Sheet (1 of 3)", of 1)". dated 10/2/2018; Sheet 23 of \$4, "EPSC Detail Sheet (3 of 5)".

- All areas of disturbance must have temporary or final stabilization within 7 days of the initial disturbance. After this time, all disturbed still must be cishilized at the end of each sacré day. Retsauyor Deacher 15 and Anril 15 all disturbed still must All areas of disturbance must have temporary or final stabilization within 7 days of the initial disturbance. After this time, all disturbed soil must be stabilized as the end of each WOR day. Between October 15 and April 15 all disturbed soil must be accepted to the control of the control Stabilization is not required if work is to continue in the area within the next 24 hours and there is no
- Stabilization is not required if the work is occurring in a self-contained excavation (i.e. no outlet) with a depth of oncontention is not required it the work a securing in a seasonname 2 feet or greater (e.g. house foundation excavation, utility trenches). The total authorized disturbance is 4.57 acre(s). No more than 2 acres of land may be disturbed at any one time.

- Inspections shall be conducted at least once every (7) calendar days and within twenty-four (24) hours of the end of a
- If there is a discharge of visibly discolored atomissiste from the construction site to waters of the Gate, the normings shall cake immediate correction serion. If after computation construction site to waters of the Gate, the normings shall cake immediate correction serion. If there is a discharge of visibly discolored atomwater from the construction site or from the construction site to waters of the State, the permittee shall take immediate corrective action. If, after completing corrective action, there continues to be a discharge of sediment from the construction site to waters of the State, the permittee shall notify DEC by submitting a sequence of the discharge.

report within 1/2 money of the discourage.

The On-site Plan Coordinator shall have a copy of the approved EPSC Plan and all amendments available at a central location or site for the use of all those identified as having responsibilities under this authorization whenever they are on the construction site. If an on-site location is unavailable to store the EPSC Plan when no personnel are present, notice of ocedion on-site for the use of all those identified as having responsibilities under this authorization whenever they are on the construction site. If an on-site location is unavailable to store the EPSC Plan when no personnel are present, notice of the construction the construction site. If an on-site location is unavailable to store the EPSC Plan when the EPSC plan's location shall be posted near the main entrance at the construction when the materials, we are unavailable to a posted location shall be posted in an accurate the construction of the property of th Construction General Permit dated 11.13.18

the planning, design, construction, maintenance, and operation of highway and transit systems. The goal of these Communities of Practice is to promote environmental

Individual Community of Practice discussions are facilitated and moderated by Center

technical experts. Typically, the communities participate in regular conference calls,

provide forums for invited professionals to discuss and exchange information, experiences, ideas, and best practices on a range of environmental topics related to

stewardship and to encourage innovative ways to streamline the transportation

Communities of Practice currently exist for the following three topic areas:

delivery process.

Air Quality
 Environmental Justice

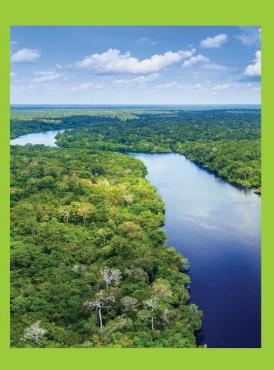

Historic Bridges
 Stormwater Management
